

MetPro Ltd is pleased to announce that it will now assume control of Somerville & Morrison's manufacturing facility with immediate effect.

MetPro Ltd is a technology based company that develops and manufactures specialised packaging materials such as paper, plastics and board. This specialised packaging is used in the automotive, metal component and steel industries.

MetPro Ltd has an established track record for supporting and developing customized solutions for companies and also supplying application support. MetPro Ltd continues to develop innovative quality products thereby sustaining its commitment to excellence.

By assuming control of Somerville & Morrison's manufacturing facilities in Glasgow we will continue to offer you a high level of customer service & excellent product quality. We will assume control of all manufacturing functions with immediate effect.

We at MetPro are looking forward to working with you in the future and building on the already successful partnerships formed through Somerville & Morrison.
