

FEBRUARY 2009

MetPro Group is pleased to announce that it will now assume control of Rapaid (Birmingham) Ltd's manufacturing facility with immediate effect.

MetPro Ltd is a technology based company that develops and manufactures corrosion protection additives for incorporation into packaging materials such as paper, plastics and board. This specialised packaging is used in the automotive, metal component and steel industry to prevent corrosion during storage and shipment.

MetPro Ltd has an established track record for supporting and developing customized solutions for companies that wish to outsource VCI chemical ingredients, corrosion control technology and application support. MetPro Ltd's existing chemical manufacturing base continues to develop innovative quality products, thereby sustaining its commitment to excellence in corrosion control.

By assuming control of Rapaid's manufacturing facilities we will continue to offer a high level of customer service & excellent product quality. We will assume control of manufacturing functions with immediate effect.

We at MetPro are looking forward to working with you in the future and building on the already successful partnerships formed through Rapaid.
