

## RAPID STEEL COIL PROTECTIVE FILM

Developed with the Steel Industry for the Steel Industry for both automatic and hand wrapping of steel coils.

**INCREASED STRENGTH AND DURABILITY – SUPERIOR TEAR & SCUFF RESISTANCE BRAND IDENTITY AND ANTI-CORROSION CAPABILITIES**

### UNIQUE FEATURES

- Usually no internal edge protection needed- reducing production process downtime
- Only ONE layer of RAPID should be needed for total protection.
- Doubling the number of coils which can be wrapped per machine versus stretch film
- RAPID is 6 times stronger than stretch film
- Reduction in transport insurance costs
- Reduction in transport cost – de-humidifiers not required for RAPID wrapped coils
- Recyclable – reduction in Carbon Footprint and can easily be removed in one sheet
- Offers 4 times the level of VCI protection versus stretch film
- RAPID does not contain plasticisers – no surface residue / markings or tarnishing
- Excellent branding opportunities
- Significant waste reduction in both steel and packaging materials
- Compatibility with all major automatic coil wrapping machinery

## RAPID STEEL COIL PROTECTIVE FILM

Developed with the Steel Industry for the Steel Industry for both automatic and hand wrapping of steel coils.

**A COMBINATION OF HIGH STRENGTH FILMIC SUBSTRATES AND SUPERIOR COATING AND PRINTING TECHNOLOGY MAKES RAPID FILM THE FIRST CHOICE FOR STRENGTH, DURABILITY, BRAND ENHANCEMENT AND CORROSION INHIBITION.**

Rapid film is a unique combination of :

- High strength film substrates, typically 50 to 100 micron
- Multicolour printing for optimum branding opportunity
- Targeted corrosion inhibitor coating where needed
- Unique banded cohesive sealing system ensures superior pack integrity and uniform unit costs
